PROFESSIONAL SUMMARY

Full Stack Engineer with 3+ years of enterprise application development experience, building and maintaining 15+ mission-critical intranet tools used across manufacturing plants on multiple continents. Proven track record of delivering measurable business outcomes: 35% performance improvements through code optimization, 45% code reduction via reusable component frameworks, and $50K+ annual cost savings by replacing redundant SAP licenses with custom-built interfaces. Currently managing an external development team while simultaneously developing core platform features, overseeing database access controls, and maintaining production-grade enterprise software integrated with SAP. Combines deep technical expertise in C#, ASP.NET Core, Blazor, and SQL Server with practical knowledge of lean manufacturing and continuous improvement methodologies.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, PHP, HTML5, CSS3
Frameworks & Libraries: ASP.NET Core, Blazor (Server & WebAssembly), .NET 8, MudBlazor, React, Angular, Entity Framework Core (EF Core), jQuery, React Hooks
Databases: Microsoft SQL Server, MySQL, MongoDB, SQLite, T-SQL, Stored Procedures
Frontend & Styling: Tailwind CSS, Bootstrap, SCSS, Responsive Design, Razor Components
Development Tools: Visual Studio 2022, VS Code, Git, GitHub, Bitbucket, Docker Compose, Postman, Swagger, npm/Node.js
Design & Collaboration: Figma, Adobe XD, JIRA, Microsoft Teams, Power Automate, Microsoft Office, Google Workspace
Integration & APIs: SAP API Integration, RESTful Web Services, Web API, JSON, AJAX
Methodologies: Agile/Scrum, Lean Manufacturing, 5S, ISO Compliance, Continuous Improvement (Kaizen)

PROFESSIONAL EXPERIENCE

Associate Full Stack Engineer

VarioSystems (Pvt) Ltd | Colombo, Sri Lanka | June 2025 – Present

- Manage and coordinate an external development team building internal enterprise tools, overseeing project delivery timelines, code quality reviews, and sprint planning to ensure on-time releases aligned with business requirements.
- Develop core platform features and shared services that support external team development, while simultaneously maintaining and enhancing production-level enterprise applications used globally across plants in multiple continents.
- Control and monitor database access for external teams, implementing role-based permissions and audit trails to protect sensitive production data while enabling efficient development workflows.
- Spearhead development of scalable intranet applications using C#, ASP.NET Core, Blazor, MudBlazor, and .NET 8, supporting manufacturing and administrative operations across multinational teams.
- Developed and deployed the Part Request Tool, a globally used application integrated with SAP, automating multi-level approval workflows and implementing complex cross-verification logic for warehouse operations.
- Led end-to-end migration of the Logistics Tool from .NET 6 to .NET 8, delivering improved performance, maintainability, and tighter integration between logistics tracking and customer feedback workflows.
- Designed and implemented reusable helper services and component libraries, achieving 45% code reduction across multiple internal tools and accelerating feature delivery for the team.
- Led the design of intuitive, accessible interfaces for production-floor and administrative staff, standardizing Tailwind CSS for mobile-responsive, consistent frontends across all Blazor-based platforms.
- Mentor interns and junior developers on UI/UX principles, documentation practices, and JIRA-based task tracking; conduct technical interviews and lead onboarding processes.
- Manage IT procurement processes, sourcing and negotiating with vendors; provide administrative leadership in the absence of department heads, ensuring team alignment and decision-making continuity.

Software Developer

VarioSystems (Pvt) Ltd | Colombo, Sri Lanka | October 2023 – May 2025

- Built and maintained intranet solutions using C#, ASP.NET Core, Blazor, and MudBlazor tailored to EMS and wire harness manufacturing operations, delivering key tools used daily by production staff.
- Delivered the CutList System for time tracking, efficiency analysis, and material sorting, and a task management application for prioritizing and monitoring workflow across departments.
- Engineered a simplified SAP access interface for factory staff, saving $50K+ annually by eliminating redundant SAP licenses through custom UI components and secure workflow integration.
- Optimized application responsiveness and component performance, achieving 35% improvement in load times across internal platforms through code refactoring and query optimization.
- Developed internal forms using Windows Forms and automated processes with Power Automate and Microsoft Teams (Kanban); implemented a Kaizen submission system to collect improvement ideas from staff.
- Handled PC/OS setup (Windows 10/11), network cabling, and hardware rollouts; documented infrastructure using Docusnap including cable mapping, device registration, and server diagrams.
- Completed certifications in 5S, Lean Manufacturing, ISO standards, and Health & Safety, aligning development work with global quality benchmarks.

Web Developer & Founder

Royalda | Wattala, Sri Lanka | March 2017 – May 2023

- Founded and operated a web development consultancy for 6 years, managing the full project lifecycle from client acquisition and requirements gathering through design, development, deployment, and ongoing maintenance.
- Delivered 4+ client projects including event management platforms, eMarketing solutions, classified ad portals with integrated payment systems, and browser extensions with API integration.
- Planned and engineered RESTful web services, optimized web applications for speed, scalability, and security, and adhered to SEO best practices across all client sites.
- Built full-stack solutions using HTML, CSS, JavaScript, jQuery, PHP, AJAX, and JSON; provided front-end development using WordPress and HubSpot.

Call Center Representative

Sampath Bank | Colombo, Sri Lanka | July 2016 – January 2017

- Delivered exceptional customer service handling high-volume calls, resolving account discrepancies, and escalating complex issues; received multiple positive reviews for dedication to customer satisfaction.

EDUCATION

BSc (Hons) in Computing – Final Year

Buckinghamshire New University, United Kingdom | June 2025 – Present

International Higher Diploma (IHD) Level 5

Buckinghamshire New University, United Kingdom | October 2022 – January 2025

Level 3 Diploma in Information Technology

ESOFT Metro Campus, Sri Lanka | November 2023 – June 2024

CERTIFICATIONS & TRAINING

5S Methodology | Lean Manufacturing | ISO Standards Compliance | Health & Safety
